

CONTENTS

<i>Foreword</i>	i
<i>Preface</i>	ii
<i>Contributors</i>	iv
<i>Part I: Modeling</i>	
An Introduction to Fluid-Porous Interface Coupling M. EHRHARDT	1
Modelling transfers at a fluid-porous interface: A multi-scale approach M. CHANDESIRIS AND D. JAMET	10
<i>Part II: Numerical Techniques</i>	
Numerical methods for subsurface flows and coupling with surface runoff P. SOCHALA AND A. ERN	28
Spectral discretization of the Stokes problem with mixed boundary conditions K. AMOURA, CH. BERNARDI, N. CHORFI AND S. SAADI	38
Decoupled Algorithms for the Coupled Surface/Subsurface Flow Interaction Problems M. CAI	58
<i>Part III: Practical Applications</i>	
Integrated Multi-Model Description of the Human Lungs C. GRANDMONT AND B. MAURY	83
Multiscale and Multiphysics Aspects in Modeling and Simulation of Surface Acoustic Wave Driven Microfluidic Biochips H. ANTIL, R.H.W. HOPPE, CH. LINSERMANN AND A. WIXFORTH	100
<i>Index</i>	127
